Summary
The PICkit™ 2 Starter Kit is a low-cost development kit with an easy to use interface for programming Microchip’s 8/14/20-pin Flash family of microcontrollers. This starter kit is designed to help developers get up to speed quickly using PIC® microcontrollers.

The kit provides everything needed to program, evaluate and develop applications using Microchip’s powerful 8/14/20-pin Flash family of microcontrollers. Instructions are provided in a series of twelve lessons that cover I/O, Interrupts, A/D Converters, Data Tables and Timers. All source code files for the lessons are furnished.

Code development and debugging is performed using Microchip’s powerful MPLAB® Integrated Development Environment (IDE). The MPLAB IDE is a seamless, integrated software development environment that includes a MPASM™ macro assembler, MPLAB SIM software simulator with symbolic debugger, color-coded source editor, project manager with high-level language debugging and concurrent support for development tools, including low-cost in-circuit debuggers, full-featured real-time emulators and programmers. The consistent and easy-to-use graphic user interface of the MPLAB desktop allows for rapid switching between development, debugging and programming modes within a project.

Features
- Low pin count demo board supporting 8/14/20-pin mid-range PICmicro microcontrollers
- Easy to use Windows® programming selected Flash based PICmicro® microcontrollers
- Twelve sequential lessons written in Assembly demonstrate how to use Microchip’s 8/14/20-pin Flash family of microcontrollers
- Technical documentation CD including:
  - PICkit 2 User’s Guide
  - Low Pin Count Demo Board User’s Guide
  - Tips ‘n Tricks Booklets
  - Selected Application Notes
- FREE! Microchip’s MPLAB IDE software for a complete code development environment
- FREE! HI-TECH PICC™ LITE C Compiler (contained on the MPLAB CD)

Host System Requirements
- PC-compatible system with an Intel Pentium® class or higher processor, or equivalent
- CD-ROM drive
- Available USB port
- Microsoft Windows 98 SE, Windows 2000 or Windows XP

PICkit 2 Starter Kit Contents
- PICkit 2 Development Programmer
- Low Pin Count Demo Board with 20-pin PIC16F690
- PICkit 2 Starter Kit CD ROM
- MPLAB IDE (Integrated Development Environment) CD ROM
- Software and Hardware “Tips ‘n Tricks” for PIC Microcontrollers
- USB Interface Cable
Ordering Information
The PICkit 2 Starter Kit includes everything needed to program, evaluate and develop applications using Microchip’s 8/14/20-pin Flash family of microcontrollers.

Customer Support
Microchip maintains a worldwide network of distributors, representatives, local sales offices, Field Application Engineers and Corporate Application Engineers. Visit our web site at www.microchip.com for additional product information and sales office locations.

Development Tools from Microchip

- **MPLAB® IDE**: Integrated Development Environment (IDE)
- **MPASM™ Assembler**: Universal PICmicro® Macro-Assembler
- **MPLINK™ Linker/MPLIB™ Librarian**: Linker/Librarian
- **MPLAB SIM**: Simulator Software Simulator
- **MPLAB C18**: C Compiler for PIC18CXXX MCUs
- **MPLAB C30**: C Compiler for dsPIC30F MCUs
- **PICkit™ 1/PICkit 2**: PICkit 1 Flash Starter Kit/PICkit 2 Starter Kit
- **MPLAB ICD 2**: In-Circuit Debugger
- **MPLAB ICE 2000**: Full-featured Modular In-Circuit Emulator for PIC12, PIC16 and PIC18 MCUs
- **MPLAB ICE 4000**: Full-featured Modular In-Circuit Emulator for PIC18 and dsPIC MCUs
- **PICSTART® Plus Programmer**: Entry-level Development Kit with Programmer
- **MPLAB PM3 Device Programmer**: Full-featured, Modular Device Programmer
- **Analog & Interface Boards**: A variety of demonstration and evaluation boards for interface, linear, mixed-signal, power management and thermal management functions.
